

Recycle For the Cure

Beginning now, our entire recycling program will be dedicated to Breast Cancer Awareness. 100% of our recycling proceeds will be donated to assist with research for a cure for this disease that touches nearly everyone's lives at some point and in some form. Breast Cancer is an issue that matters to us, so we are going to do everything we can to help with it's prevention, treatment, and public awareness - including painting our trucks pink!

Our list of recyclable items:

- clear glass
- colored glass

- shoe boxes
- pizza boxes
- cereal boxes
- detergent boxes
- soda cartons
- beer cartons
- chip board
- posterboard

Your new large, covered, rolling recycling container allows for over 300% more recycling capacity than a standard, small recycling bin. This means more items in your recycling container and less garbage in your garbage can. This also means no more recycling items being blown out of your recycling bin and all over your street on windy days. We now accept over 40 categories of recyclable items - more than any other company in our area (see our complete list to the right).
